

STAFIX AN90

The AN90 is the most powerful and versatile strip grazing unit available in its class, powering up to twice the amount of fence as most competing strip grazers. With the option of 4 x 'D' size torch batteries or an external 12V battery, the AN90 provides flexibility for all farm conditions.

- * 0.12J maximum output energy
- * Up to 7,500V output voltage
- * Powers up to 2km of fence/poli-product
- * Two pulse speed options
- * Pulse indicator light
- * Clips directly onto galvanised wire or poliwire, tape or braid for strip grazing
- * Available as a single unit or complete with mounting stand
- * Stand doubles as an earth stake

PATRIOT SX

The Patriot SX is the most powerful solar energiser in its class. This self-contained solar unit provides a compact, versatile alternative to small solar installations while maintaining the dynamic performance of a premium small energiser.

- * Large 2.6W solar panel
- * Up to 8500V output voltage
- * Powers up to 4km of fence
- * All-in-one carry unit with soft carry handle
- * Easily mounted with a Y-post/T-post case recess and wood post bracket
- * Three pulse speed options
- * Two output level options
- * Night time battery save option (light sensor)
- * Robust water and insect resistant case

CB1.2 & 2.3 CARRY BOX BATTERY ENERGISERS

The stafix carry box battery energiser range offers rugged portability and a range of advanced features as well as delivering exceptional power output and performance.

- * 1.2/2.3 J maximum output energy
- * Up to 10.5 kV output voltage
- * Power up to 10 km/25km of fence
- * Combine full or half power with fast or slow pulse speed for flexibility and battery saving capabilities
- * Pulse lights indicate voltage performance
- * LED feedback to indicate battery level
- * Battery protection technology
- * Suitable for farms up to 6 hectares/17 hectares
- * Rugged, weather-proof design ideal for the harshest conditions
- * Battery leads included
- * 2 year warranty

JVA 12V DC ENERGISERS

The imported, non-cyclic wave JVA range of energisers provides the farmer with an economical high-powered energiser to electrify his paddock, camp, kraal or boma. The B8 & B12 units have the added feature of an LCD display which shows the current output voltage.

Model	Output Voltage	Stored Energy	Output Energy	Average 12V Drain	Suggested Solar panel
B5	8.2 kV	6.5J	4.5J	400mA	50W
B8	8.7kV	12J	8.0J	675mA	80W
B12	9.0kV	18J	11.8J	1012mA	120W

PET ENERGISERS

Inexpensive & easy to install, Pet Electric Fence Kits

The basic kit includes:

- * 1 x Energiser
- * 8 x Fibreglass Poles (8 x 850mm)
- * 1 x Fence Wire (200m)
- * 1 x Earth Spike
- * 24 x Springs
- * 1 x Warning Sign

MAINS UNIT

TORCH BATTERY PORTABLE UNIT

For larger dogs & longer distances, pet electric fence kits can be made up by using strip grazing accessories and energisers.

WARNING DEVICES

MINI SOUND BOMB

BUZZER 6-12 Volt DC

SIREN 10W/15W - 12V DC

SIREN 25W/30W

FLASHING LIGHT
